SAFIM

Founded in 1977 as a family-owned business, the company has experienced steady growth over more than four decades. In 2019, it became part of the Dex-Ko Global Group, strengthening its international presence and accelerating its path toward global expansion.

With solid roots as a manufacturer of braking components and a strong expertise in developing highly customized solutions, it is now evolving into a system provider for electro-hydraulic braking functions.

Its technologies are trusted in demanding applications across multiple sectors, including agriculture, material handling, mining, heavy load transport, aircraft towing, construction, and urban cleaning.

BRAKING SYSTEMS

FLUID-PRESS

Founded in 1971 as a family-owned business, the company has built a solid reputation in the design and production of hydraulic valves and manifold blocks. Since 2022, it has been part of the Dex-Ko Global Group, strengthening its capabilities and expanding its global reach.

At the core lies a strong customer focus: listening, adapting, and providing dedicated support while continuously investing in the expertise and skills required to thrive in an increasingly competitive market.

Its solutions are widely used across multiple industries, including agricultural machinery, industrial vehicles, cranes, aerial platforms, and earth-moving equipment.

HYDRAULIC SYSTEMS

CERMA

Founded in 1966, the company brings more than 55 years of expertise in precision mechanics, specializing in the production of turned, milled, and ground components for medium and large series.

Since 2024, it has been part of the Dex-Ko Global Group as a strategic partner serving mainly the Hydraulic Business Unit but leaving space to keep serving a wide range of industries, including automotive, power transmission, hydraulics, agricultural machinery, and industrial equipment.

PRECISION MECHANICS

The AL-KO Vehicle Technology Group is a swiftly growing global technology group and a business unit of DexKo Global. DexKo Global was founded in 2016 through the merger of Dexter and AL-KO Vehicle Technology and is one of the world's leading manufacturers of high-quality chassis technology, chassis assemblies, accessories and hydraulic brake components

VISION

HYDRAULIC POWER FOR A BETTER LIFE

Design **hydraulic power systems** that **evolve around people needs** and their challenges, **turning experience, technology, and passion into tangible and sustainable value.**

This is our guide, our responsibility, and **the promise we are committed to keep** — every day — **for those who work with us, for the planet, and for future generations.**

MISSION

EVOLVING AROUND YOUR NEEDS

Support our customers at every stage by **offering integrated, customized solutions** and services that **simplify complexity** and ensure maximum reliability and **outstanding performance.**

VALUES

CUSTOMER FOCUSED
EXPERTISE
INNOVATION
RELIABILITY
FLEXIBILITY
SAFETY & ENVIRONMENT

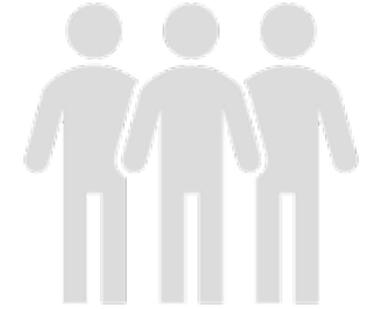

Always close, always **supportive**
Decades of **engineering know-how**
Ahead of trends, beyond standards
Trustworthy, transparent relationships
Challenges turned into **growth**
Performance-driven, operator-focused and environmental care

BRAKING SYSTEMS

TRAILER BRAKE UNITS

POWER BRAKES VALVE

MASTER PRIORITY VALVES

MASTER CYLINDERS

HAND BRAKE VALVES

TOWED VEHICLE

Product line specifically dedicated to braking systems for off-highway vehicles. The range includes power brake valves, hand brake valves, master priority valves, master cylinders, and complete systems for towed vehicles.

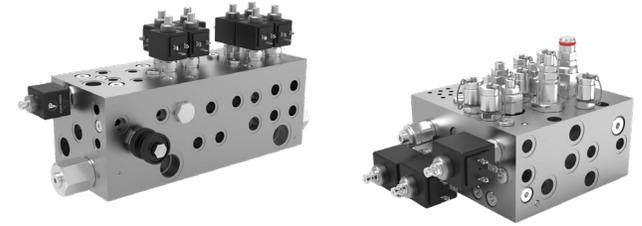

HYDRAULIC SYSTEMS

PARTS IN BODY

CARTRIDGES

HYDRAULIC INTEGRATED CIRCUITS

Product line specifically dedicated to the actuation systems of off-highway and industrial vehicles.

The range includes cartridge valves, parts-in-body solutions, and manifolds.

PRECISION MECHANICS

CUSTOMIZED MANIFOLD

PRECISION TURNING

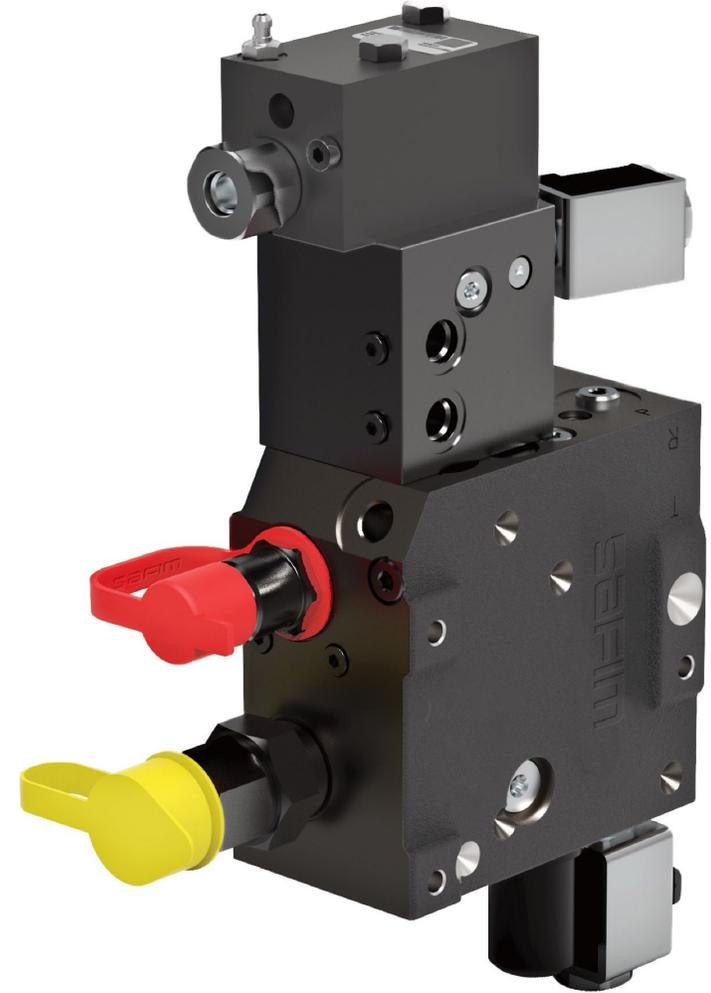

Strategic partner for hydraulic component manufacturers, Cerma also serves a wide range of industries beyond hydraulics, including automotive, power transmission, and industrial equipment.

EVOLVING AROUND YOUR NEEDS

TBU-P

TBU-P is the evolution of a widely known product like Trailer Brake Unit, which **expresses the synergic collaboration between the companies** of the hydraulic business unit Safim.

- Product includes electrical components and precision mechanics parts that provide a complete product manufactured entirely internally.

R & D

Our Research & Development department is the heart of the company's innovation.

Our mission is to develop new products and services based on emerging technologies, anticipating future market needs and creating solutions that proactively respond to customer demand.

Through a **co-design approach**, we actively collaborate with stakeholders, partners, and end users to design products and services that are functional, innovative, and truly valuable.

Our commitment to protecting **intellectual property** is reflected in **65 patents**, demonstrating our ability to turn innovative ideas into concrete and strategic solutions for the company.

PRODUCT AND PROCESS MANAGEMENT

Our ISO 14001:2015, ISO 45001, and ISO 9001:2015 certifications demonstrate our commitment to quality, sustainability and safety, offering customers the assurance of reliable products and services, ethical production, and a safe workplace.

ENVIRONMENT, SAFETY AND HEALTH

Safety and Health of our people are top priority for our Group. We continuously invest in training and personal protective equipment to prevent injuries. **Our target is a near zero accident.**

Environmental responsibility goes hand in hand with safety. We minimize our impact through a comprehensive waste recycling policy and the production of renewable energy from photovoltaic systems.
