

SAFIM Showcases Product-Driven Innovation and Global Strength at CONEXPO-CON/AGG 2026

Las Vegas, March 3–7, 2026 – Safim Group, a leading provider of hydraulic systems and components for construction and off-highway vehicles, announces its strategic presence at CONEXPO-CON/AGG 2026. With continuous participation dating back to 2012, this year's edition highlights the evolution of the company toward a product-oriented strategy that maximizes relevance for the dealer market with cutting-edge technological solutions.

Exhibition Stand: Cross-Sector Products to Meet the Needs of All Off-Highway Sectors

Safim's products are designed to be versatile across all sectors where off-highway vehicles are used, providing solutions that address the diverse needs of construction, industrial, agricultural, and other off-highway applications.

- Hydraulic systems and braking components for construction and off-highway vehicles
- Cartridge valves, parts-in-body solutions, and manifolds designed to maximize performance and integration
- Solutions supporting assisted and autonomous driving technologies for smart machines

This broad range of products reflects Safim's commitment to delivering high-performance, adaptable components, making the company a reliable and flexible partner for dealers and end customers alike.

Innovation in Action: Co-Design and Real Results

Innovation at Safim is rooted in collaboration with partners, stakeholders, and end users. The Research & Development team drives innovation through a co-design approach, transforming expertise and technology into practical, reliable solutions.

To explore these advancements and see the solutions in action, Safim has published corporate videos on its official YouTube channel:

□ Safim Innovation Overview:

<https://youtu.be/81grWNgAHaE>

□ Expert Stage at Agritechnica 2025 – Valeriomarco Montanari, R&D Director:

<https://youtu.be/qmCWp4OjWK4>

These videos illustrate the technological development and vision guiding Safim's solutions, particularly in advanced hydraulic control and smart vehicle technologies.

Global Mindset – Local Impact

Safim Group applies a global mindset with local impact, built on three key pillars:

- International presence in continuous expansion – Safim supports clients and partners in key markets through a network of commercial and technical facilities worldwide.
- Distributed production capabilities – Manufacturing operations in Italy and India enable flexibility, speed, and responsiveness to local market needs.
- Customer-oriented partnership – Safim has always positioned itself as a dedicated partner, providing solutions tailored to the specific needs of each client and dealer channel.

This combination of broad presence, distributed production, and customer focus allows Safim to bring global engineering excellence directly to the markets where it operates.

Safim, Fluid-Press, and the Path to a Unified Brand

Safim s.r.l. and Fluid-Press s.r.l. share a long history of development and complementary expertise. Both companies have progressively strengthened their role in the off-highway and industrial vehicle component markets, bringing specific competencies in hydraulics, control, and electronics.

Joining the DexKo Global Inc. group, which manages the companies through the **AL-KO Vehicle Technology Group**, has facilitated integration of expertise and the creation of a unified vision. Today, Safim presents itself to the market under the SAFIM brand, which unites:

- Safim s.r.l., historic Italian company in braking and hydraulic systems
- Fluid-Press s.r.l., with cartridge valves, manifolds, and parts-in-body solutions

This evolution confirms the group's commitment to offering a complete, technologically advanced product portfolio aligned with the expectations of global partners, dealers, and end users.
